

# Givver.ai Cookie Policy

This policy explains how Givver.ai uses cookies and similar technologies such as local storage. Last updated: 29 May 2026.

Contact	For questions about cookies, contact info@givver.ai.
Current approach	Givver.ai should use only essential cookies/local storage unless analytics, marketing or tracking tools are deliberately added with a consent mechanism.
Important	Non-essential cookies, such as analytics or advertising cookies, generally need clear consent before they are set.

## 1. What are cookies?

- Cookies are small files placed on your device when you visit a website. Similar technologies, such as browser local storage, can also remember information on your device.
- They can help a website work properly, keep a user signed in, remember preferences, improve security, process payments or understand how the website is used.

## 2. How Givver.ai uses cookies and similar technologies

- We use cookies and similar technologies to operate campaign pages, donation forms, admin dashboards, language choices, security sessions and payment flows.
- We aim to keep this simple and use only what is needed to provide the service safely and reliably.

## 3. Essential cookies and storage

- Authentication and session storage: used to keep campaign admins and platform admins signed in, protect admin areas and maintain secure sessions.
- Language preference: used to remember the language selected on the site.
- Donation form convenience: may remember donor name/email locally on the device when appropriate, so returning donors do not need to retype details. Payment card details are not stored by Givver.ai.
- Security and fraud prevention: used to help protect donation forms, admin actions, campaign pages and payment flows.
- Payment processing: Stripe and other payment providers may set cookies or use similar technologies to securely process payments, detect fraud and support Apple Pay, Google Pay or card payments.

## 4. Non-essential cookies

- If Givver.ai adds analytics, advertising, heatmaps, social tracking or similar non-essential tools, we should ask for consent before those cookies or similar technologies are set, unless an exemption applies.
- Users should be able to reject or manage non-essential cookies without losing access to essential donation and campaign functions.

## 5. Third-party cookies

- Some services used by Givver.ai may set their own cookies or similar technologies. This may include payment providers, hosting/security providers, email systems, translation tools or analytics tools if enabled.

- Stripe's cookies and security technologies are used to process payments, prevent fraud and keep payment details secure. Givver.ai does not receive or store full card numbers or CVC codes.

## 6. Managing cookies

- You can usually control cookies through your browser settings. Most browsers allow you to block cookies, delete cookies or receive warnings before cookies are stored.
- Blocking all cookies may cause parts of Givver.ai to stop working properly, including admin login, campaign dashboards, donation forms, payment processing and language preferences.

## 7. Cookie list

The exact cookie names may change as the platform develops. The main categories we expect to use are listed below.

Type	Purpose	Essential?
Supabase/session	Keeps admins signed in, protects authenticated dashboard sessions and supports secure account access.	Yes
Language preference	Remembers selected site language.	Usually yes
Donation form local storage	May remember donor name/email on that device for convenience. Donors can clear it by using browser settings or the Not you option where shown.	Functional
Stripe/payment	Processes payments securely, supports wallets, manages fraud checks and payment authentication.	Yes
Cookie consent	If added, remembers cookie choices so users are not repeatedly asked.	Yes
Analytics/marketing	Only if enabled in future, used to understand site usage or marketing performance.	No - consent needed

## 8. Changes to this policy

We may update this cookie policy when our website or providers change. The latest version should be available on Givver.ai or through campaign pages.

## 9. Contact

For questions about this cookie policy, contact [info@givver.ai](mailto:info@givver.ai).

Publishing note: before publication, run a cookie scan on the live site and update the cookie list with exact cookie names, providers and durations. Add a cookie banner/settings tool before using non-essential analytics or marketing cookies.
